

COVID-19

WEAR A MASK WELL, TO BETTER PROTECT

Wash your hands **before** putting on your mask

And **after** removing it

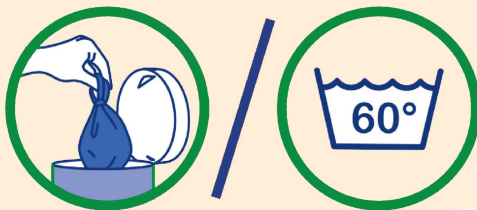

Put on and remove the mask by taking it by the straps

Cover the nose and mouth (do not do this drastically reduces the effectiveness of the mask)

Once installed and adjusted, do not touch it

After use, place the mask in a closed bag and throw it away **or** if it is made of fabric, wash it at 60° for 30 min

The mask is an additional means of protection which does not replace barrier gestures.

The government is counting on good citizenship to avoid a renewed epidemic.
